## About Hawthorn Oil Transportation (Oklahoma), Inc.

Placed in service January 2010, Hawthorn Oil Transportation operates a 12" pipeline that transports crude oil 17.5 miles from a rail facility in a Stroud, Oklahoma industrial site to the centralized crude oil hub in Cushing, Oklahoma. The line has the capability to transport up to 90,000 barrels per day of crude oil.

## Products Transported and Counties Involved

Product	Description	Health and Fire Hazards	Counties Involved
Crude Oil	<p><b>Leak:</b> Liquid</p> <p><b>Vapor:</b> Lighter than air. Can be flammable. Dark brown spots on the ground, dead vegetation or an oily sheen on top of the ground or floating on the surface of a body of water may indicate the presence of a leak in a crude oil pipeline system.</p>	<p><b>Health:</b> Irritation of the eyes and skin may occur with exposure. Vapors may cause central nervous system effects.</p> <p><b>Fire:</b> Crude oil is an extremely flammable liquid or vapor that is heavier than air. May accumulate in low areas, and may travel considerable distances to an ignition source.</p>	Lincoln Payne
