About ONEOK NGL Pipeline, L.L.C.

ONEOK NGL Pipeline, L.L.C. operates approximately 3,300 miles of pipelines throughout the state of Oklahoma that gather and transport products known as natural gas liquids. These products at any given time can be a varied mixture of NGL (Natural Gas Liquids), LPG (Liquid Petroleum Gas) or HVL (Highly Volatile Liquids). They are a mixture consisting of ethane, propane, butane, natural gasoline, ethane-propane mixture and propylene. The Oklahoma pipeline system gathers Raw Natural Gas Liquids and transports the products to a fractionation plant in Medford, Okla. Once the products have been fractionated, they are distributed to areas in Central Kansas and Gulf Coast markets. This system consists of pipelines ranging from 3 inches to 14 inches in diameter. For more information, or for a copy of our Emergency Response Plan, please send an email to pipelineawareness@oneok.com.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards	Counties Involved		
Propane, Butane or Highly Volatile Liquids (HVLs)- Natural Gas Liquids Ethane, Gasolines, Diesel, etc.	<p>Leak: Liquid/Gas</p> <p>Vapor: Heavier than air. Very flammable and a white vapor cloud may be visible near the site of a leak.</p>	<p>Health: Respiratory tract irritant; may cause central nervous system effects</p> <p>Fire: Extremely flammable liquid or vapor; vapors may accumulate in low areas and travel considerable distance to ignition source</p>	Alfalfa	Ellis	Marshall
