About Oklahoma Natural Gas

Oklahoma Natural Gas, a division of ONE Gas, provides clean, safe and reliable natural gas to more than 860,000 residential, commercial and industrial customers across Oklahoma. Natural gas is delivered to the company's distribution systems from transmission lines, some of which are owned by Oklahoma Natural Gas, at operating pressures typically between 150 psig and 500 psig. Natural gas is then delivered through distribution pipelines that generally operate at 60 psig or less. Oklahoma Natural Gas maintains, operates and monitors approximately 19,000 miles of transmission, distribution and service pipelines.

Products Transported and Counties Involved

Product	Description	Health and Fire Hazards
Natural Gas	<p>Leak: Gas</p> <p>Vapor: Lighter than air.
