About White Cliffs Pipeline, LLC

White Cliffs Pipeline, LLC operates two parallel 527 mile 12” diameter crude oil pipelines that extend from Platteville, Colorado to Cushing, Oklahoma. The pipeline transports high quality crude oil produced from the Wattenberg field in the Denver Julesburg Basin of Colorado to the market and pipeline interconnect center at Cushing, Oklahoma, known as the “Cushing Hub”. White Cliffs is operated by Rose Rock Midstream, LP headquartered in Tulsa, Oklahoma. Rose Rock Midstream gathers, transports and stores crude oil and condensates.

Products Transported and Counties Involved

Product	Description	Counties Involved
Crude Oil	<p>Leak: Liquid</p> <p>Vapor: Heavier than air Can be flammable. Dark brown spots on the ground, dead vegetation or an oily sheen on top of the ground or floating on the surface of a body of water may indicate the presence of a leak in a crude oil pipeline system.</p> <p>Health: Irritation of the eyes and skin may occur with exposure. Vapors may cause central nervous system effects. Possible presence of H₂S, a toxic gas.</p> <p>Fire: Crude oil is an extremely flammable liquid or vapor that is heavier than air. May accumulate in low areas, and may travel considerable distances to an ignition source.</p>	Payne Kay Grant Noble
